

Highlights of Hackman Show Pig Battleground Series line

- 100% of selenium provided by organic selenium in the form of Sel-Plex®
 - Sel-Plex® Selenium allows animals to optimize health status during periods of increased demand.
 - Sel-Plex® Optimizes animal performance.
 - Sel-Plex® Supports mineral retention.
- Contains Actigen®, a cost-effective means of maintaining gut health and integrity to support overall performance.
 - Actigen® is an advanced hydrolyzed yeast product that helps animals reach their full genetic potential through strong gut health.
 - Aids in animal performance and nutrient absorption in the gut.
- Contains Bioplex® Organic Trace Minerals
 - Offers higher bioavailability than inorganic minerals.
 - Reduces concerns about negative mineral interactions.
 - Supports mineral retention and tissue reserves.
 - Reinforces mineral status, which leads to optimal overall health, immune status and reproductive function in the animal.
 - Is readily absorbed, stored and utilized by the animal.
- Contains Integral® A+, the world's number one selling mycotoxin management additive.
 - productivity inevitably brings new challenges and risks to modern animal production that cannot be avoided. Integral A+ can be a solution.
 - If you are feeding corn or wheat, you should also be feeding Integral® A+
- Contains Villigen™, an innovative in-feed technology that aids in developing gut form and function while optimizing the immune system to maintain health status.
 - Viligen promotes gut health by directly targeting the gut mucosa. It supports the immature gut for efficient nutrient absorption and rapid growth. It also encourages feed intake by providing fatty acids, prebiotic components and readily available mineral forms.
 - Drives feed intake.
 - Optimizes gut function.
 - Supports health and survivability.
 - Promotes better intestinal health, leading to improved performance.
